TELEPARENT offers the most flexible and comprehensive automated notification solutions in K-12 Education. Whatever the challenges your district faces, TeleParent’s suite of services can help by eliminating all barriers to effective communication; from informing the community in times of crisis to involving parents in the classroom on a daily basis. All TeleParent solutions are hosted Software-as-a-Service platforms, requiring very little setup or ongoing maintenance by district personnel.

Community Outreach

District and School Administrators can quickly and easily create custom messages to send to designated groups of all students, all staff, or any other groups, such as clubs, sports teams, grade levels, or special needs. Using TeleParent’s online interface and 800-number, users can schedule, edit, and record several messages at once.

Emergency Notification Plus!

Notify thousands in seconds when it matters most. TeleParent’s Emergency Notification Plus! adds some of the most innovative features of any emergency calling solution. Tailored to the K-12 environment, ENP! offers easy and flexible ways to send out calls to your entire community or specific groups in just minutes.

Smart Attendance

Smart Attendance is an automated service that seamlessly integrates with the district’s SIS to immediately send messages to parents in Real-Time and in the student’s home language. It can be configured at each school site, or with default values based on type of school. TeleParent’s Smart Attendance is the most robust and effective calling solution designed for K-12 schools.

Survey Service

TeleParent’s Survey Service integrates the latest IVR survey technology with intuitive setup interfaces to generate dependable results. Collecting, analyzing, and utilizing parent feedback has never been easier.

Classroom Situational Student Messaging

TeleParent allows teachers to quickly and easily send messages specifically tailored to each student’s unique classroom experience in any language without typing or recording anything. The messages are separated into five categories, Attendance, Corrective, Grade Progress, Informational and Rewarding/Positive.

Office Situational Student Messaging

Administrators now have the ability to choose from customized menus for easy communication to families. Librarians, Resource teachers and other site administrators can have translated messages readily available for quick and specific school-to-home communication.

Lunch Service

TeleParent integrates with your Food Service vendor to send home notifications regarding lunch balances (configured to your preferences), saving your district valuable time and money.
