ESC Region 12 Video Streaming
Training Opportunities for 2019-2020

For ESC Region 12 Video Streaming Co-op Members

All districts subscribing to the Video Streaming Co-op are eligible for up to one-half day of free, on-site Discovery Education Streaming Training. Districts may choose from the following topics or request a customized training to best meet their needs. Contact Lisa McCray, lmccray@esc12.net to arrange your training.

Enriching the Classroom with Discovery Education Streaming
This session designed for "newbies" and "seasoned users" will provide a review of all of the wonderful resources available in the Discovery Education Streaming program. A special emphasis will be placed on updates and improvements to the program rolled out in Summer 2019. Participants will explore technology integration ideas and techniques for integrating video, digital project boards, and other resources into existing curriculum.

Discovery Education Streaming Spotlight on Integration Strategies
Have you been looking for a place where you can access simple and easy integration strategies for Discovery Education Streaming? Come and join us for this session where we will explore the DE Streaming "Spotlight on Strategies" series that provides weekly digital integration challenges with all the resources needed to help you integrate DE media into your curriculum.

Flipping and Blending Instruction with Discovery Streaming
Ready to flip and blend your course instruction but not sure where to start? Use the student portal in Discovery Education! Find great DE resources and assign them to students. Allow your students to search and use DE resources for their own research. Use the Student Boards for interactive projects that your students can share online. The possibilities are endless!

Discovery Education Streaming Board Builder/Studio
Do you use Discovery Education as an educator for streaming media and other digital resources for your classroom? Great! Now you need to give Board Builder and Studio a try. Teachers and students may use these exciting tools to create multimedia posters and projects that include text, images, video, audio, and documents. Studio allows you to create multiple pages and incorporate collaboration by students/teachers. Both allow seamless integration of content from Discovery Education. Users can also upload their own content from other sources. Come and explore the possibilities with us.
